

INFORMATION AND
COMMUNICATION TECHNOLOGY
(ICT) LAB ASSIGNMENT 1

Syed Muhammad Shuja Ur Rahman

Roll no. 22k-4456

Sir Mushahid Raza

LAB TASK

QUESTION 1

Write a brief summary regarding impact of ICT in our present and futures lives.

Information and communication technology or ICT has become essential to every aspect of the modern world. It has found its indispensable use in governments, industries, businesses, hospitals, schools, homes etc.

Catering to mankind's need to communicate and as swiftly as possible at that, not only ICT has provided different kinds of communication methods nowadays, but also made advances in faster computing methods. Making it easier to process huge amounts of data in a matter hours or minutes which could have taken weeks or days otherwise.

ICT education should be made available to everyone, especially in schools, for people to be able to better understand the technologies at an early age and implement its uses to improve the efficiency of the daily life.

Future holds endless possibilities with ICT. Artificial Intelligence (AI) and Internet of Things (IoT) are already picking up in several countries across the globe. Enabling people's lives and adding more than ever connectivity to the world.
